I design and build web interfaces in Vue and Tailwind CSS, from the Figma design to the code in production. I use AI every day to get there sooner and I review every line I ship: it saves me hours of typing, not thinking.

EXPERIENCE

Frontend developer
2022 – 2025

Clínica de Urgencias Bucaramanga

- Redesigned and built the clinic's website (cub.com.co): appointments, lab results and contact for each location.
- Built the clinic's intranet.

Vue 3 · Tailwind CSS · GSAP

Computing teacher
2022

Decroly Institute

- Taught computing to more than a hundred secondary-school students.

PROJECTS

KamUI
2026

Accessible component library for Tailwind CSS 4, with no JavaScript runtime and for any framework.

github.com/JotnarDev/KamUI

Hardware Diagnostics Tool
2026

Bilingual desktop app to check refurbished laptops: automatic tests, guided tests and a report tied to the serial number.

github.com/JotnarDev/hardware-diagnostics-tool

M-UI · m-btn
2024

Component library for Vue 3. The m-btn button is published on npm as @jotnar/m-btn.
